

A Photographer's Guide

Clean and maintain your
sensitive equipment

Keep it **Clean**. Keep it **New**. Keep it **Dust-Off®**.

Maintaining your camera, accessories and sets...

Dust and dirt is everywhere in our world. Mostly it goes unnoticed, but each speck becomes gigantic in the photographic industry where it seems to magnify 100 fold and in the exact place it is unwanted. To manage the removal of dust and dirt, use our line of compressed gas dusters to get these evil particles under control. Different duster sizes and nozzle options are available. If you minimize the amount of particles in and around your equipment, you will greatly reduce retouching time too.

Blast dust and dirt from these areas in the photographic environment:

- Camera lens and body: buttons, dials and knobs
- Battery and memory card compartments
- Photographic accessories and equipment
- Darkroom equipment and negatives
- Set and photographic subjects: remember to blast dust away for shooting area
- Never use on camera mirrors

Please remember these simple instructions when using our dusters:

- **DO NOT SHAKE** can
- Clear nozzle by pointing toward open space and pulling trigger quickly three times
- Keep can upright when in use.

“Thorough cleaning can prolong the life of your equipment...”

Computer Care

Your job is not complete after the camera is put down. Your computer is a vital tool in the photographic industry more than ever. Keep it running at peak performance with regular cleaning maintenance. **Our computer products include:**

- **Dusters:** clear away harmful dust and dirt for your screen, keyboard, mouse and CPU.
- **Screen Cleaners:** Monitor Wipes in a tub and premium Touch Screen Cleaner with spray and microfiber cloth for cleaning all your high tech monitor and laptop screens.

▶ Please see videos to right for instructions on how to properly clean your desktop computer and laptop.

Cleaning your computer, all your screens and lenses ensures crisp, clear imagery

Sensitive Screens

Use our premium Touch Screen Cleaner that includes an exclusive, no-run formula spray and non-lint producing microfiber cloth to keep all your sensitive screens free of dirt, grim and fingerprints, that impairs your ability to see images and data clearly.

These screens include:

- Camera viewing and data screens
- Digital photo frames
- Laptop and computer screens
- Camera lenses too!
